SUMMARY

I like to break things apart and put them back together, which is probably why I love Legos and IKEA furniture so much. I am motivated by learning and calculating all the possible ways to fix a problem.

INTERESTS

Scuba diving

WORK EXPERIENCE

2014-Present

Northwestern University - Preventative Medicine

Web Developer/Software Engineer

Developing and debugging websites and mobile apps that target behavioral interventions using AngularJS, HTML5, CSS3, and Ruby on Rails.

Interfacing with clinicians and researchers to determine technical requirements and priorities to work in an agile manner.

Continuing to create JavaScript libraries and contributing to Bower and Yeoman to assist in scalability in group's app development.

2013-2014

Razorfish

Business Analyst/Front-End Developer

Collaborated with Fortune 500 clients across six time zones and pushing code changes on a daily basis.

Reviewed code repositories and ensured best practices amongst five different disciplines via elementool, AtTask, JIRA, and Confluence.

Self-taught coding languages to better communicate with developers and became a highly-utilized front-end resource.

2012-2013

Mattersight Corporation

QA Analyst

Composed client playbooks that reduced "Help" submission by 70% and future requests from client for additional guides.

Tested and debugged new functionality to save 50+ hours and \$3,000 in development costs.

Jumped into projects at any point of lifecycle and employed scrum, agile, waterfall, and sometimes "agilefall" methodologies.

SKILLS

...on a scale of 0 to Yoda.

Programming

// JavaScript, Ruby, Python

Web

// HTML, CSS, Foundation, Bootstrap, WordPress, jQuery

Design

// Photoshop, InDesign, stick figures, latté art

Etc.

// Fluency in Korean, proficient in Spanish, pretty awesome at making playlists

EDUCATION

2008-2012

B.S. in Systems Engineering, Minor in Public Health

Washington University in St. Louis
